Initial years of VIPA Intl -> Focus on technical studies

5 studies commissioned from 2016 till now:

- Effect of moisture content on the thermal conductivity of **different types of fumed silica VIPs + behavior of different types of fiberglass desiccants** – results expected in 2020
- An integrated study on the **integration of VIPs** in ultra-low energy consumption **concrete prefabricated buildings** - March 2019
- Calibration of the lift-off technique for **measuring the internal pressure** of fumed silica VIPs and **determination of boundary conditions for the lift-off measurements** and processing of measurement raw data – April 2017
- Development of an advanced technique for **measuring the effect of moisture content on the thermal conductivity** of VIPs – April 2017
- **Compressive strength** of vacuum insulation panels according to EN 826: difficulties with the measurement results for VIPs and possible solutions – September 2016

Vienna Conference
